

Covid-19 Sick / Quarantine Policies

Season 2021-2022

Please read before your child's dance classes start

- Face masks are optional for all students, teachers and staff while in the dance rooms. Face masks are required for everyone, Kindergarten age (5) and up while in the hallways and common areas. *This policy is subject to change in accordance with our state mandates and BOH guidelines.
- Dancers and staff must STAY HOME if they are not feeling well. See the list of symptoms below.
- If a student tests positive for Covid-19, please notify us immediately. The positive student must stay home and follow their doctor's orders for resuming activities.
- If a student is deemed a close contact or if a family member living in the student's home tests positive, the student must not attend dance class for 10 days (this means student would come back on the 11th day of exposure as long as they are symptom-free) OR present a negative Covid test after the 5th day of exposure before resuming in-person class 7 days after exposure and are symptom-free (this means student would come back on the 8th day of exposure after negative test).
- LLDS will inform parents if, while at LLDS, their child has been identified as a close contact (closer than 6' for 15 min or longer) of someone who has tested positive for Covid-19.
- At this time, only 1 parent/guardian of students Kindergarten age and under are allowed to wait in the studio waiting room during class time.
- There is no eating while in the studio rooms or hallways.
- Air Purifiers will run continuously while classes are in session.
- Staff members will perform routine disinfecting of all high touch areas each day.
- LLDS will continue to monitor the Carver Board of Health's guidelines, policies, and recommendations.

Protocol regarding sick students at the studio:

- Any LLDS dancer who displays the following symptoms will need to call their parents/ guardians to come pick them up:
 - Severe Headache
 - Severe Cough
 - Visible Runny Nose
 - Shortness of Breath
 - Lightheaded
 - Feeling Feverish
 - Vomiting / Diarrhea
 - New Loss of Taste or Smell
